We advise parties to send in their orders early before assortment of stock is broken.

Claims for deductions will receive consideration only when made promptly on receipt of goods.

**Guarantee of Genuineness.** While we exercise the greatest diligence and care to have our stock true to label, it is mutually agreed between ourselves and the purchaser, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally paid for stock that proves untrue.

## Hardy Nut Trees for Northern Planting

For several years we have been specializing in the propagation of Hardy Northern Pecans and English Walnuts. Our Pecans are natives of Indiana, Illinois and Kentucky, thin shell; prolific bearers; transplant readily; bear young.

Pecans are budded on 4 and 5 year seedlings, giving strong Root System full of vitality; should not be compared with Southern Trees worked on one and two year stocks. Southern varieties will not mature fruit in the north.

**English Walnuts:** Budded on 2 and 3 year Black Walnuts. Hardy Eastern varieties and the best late vegetating French sorts; large size nuts; finest quality; on black walnut roots; ripen up wood early, are more vigorous and hardy, commence bearing at 3 to 4 years of age when well cultivated; can furnish same in thousand lots if wanted.
